## F Holdzgudli

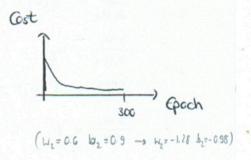

A1

(1) a) 
$$W_z = 0.6$$
  $b_z = 0.9$ 

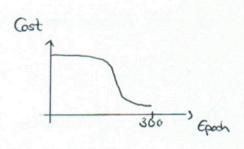

$$\frac{\partial E}{\partial b_2} = -2(T-y_2) \cdot f'(u_2)$$

$$= -2 y_2 \frac{1}{1+e^{-1.5}} \left(1 - \frac{1}{1+e^{-1.5}}\right)$$

$$y_2 = \frac{1}{1 + e^{-1.5}} = 0.2439$$

b) 
$$W_2 = b_2 = 2$$
 $W_2 = W_2 y_1 + b_2 = 2y_1 + 2 = 4$ 
 $\frac{\partial E}{\partial b_2} = 0.6353 y_2 = 0.0347$ 
 $y_2 = \frac{1}{1 + e^{-1.5}}$ 

Problem: Das Lernen beginnt sehr viel langsamer. c) Der Fahter f'(n) aus Gleichung (3) ist hauptsächlich dofür verantwortlich.

$$\frac{\partial E}{\partial b_1} = \frac{\partial E}{\partial y_2} \frac{\partial y_2}{\partial u_2} \frac{\partial u_2}{\partial y_1} \frac{\partial y_1}{\partial u_1} \frac{\partial u_1}{\partial b_1}$$

$$\frac{\partial E}{\partial y_2} = -2 (T - y_2)$$

$$\frac{\partial y_2}{\partial u_2} = f(u_2) (1 - f(u_2)) = f'(u_2)$$

$$\frac{\partial u_2}{\partial y_1} = w_2$$

$$\frac{\partial y_1}{\partial u_1} = f'(u_1) = f(u_1) (1 - f(u_1))$$

$$\frac{\partial u_1}{\partial b_1} = 1$$

$$\frac{\partial E}{\partial b_1} = -2 (T - y_2) f'(u_2) w_2 f'(u_1) \cdot 1$$

Das Problem wird verstärlit, da wir 2. f'(ui) haben.

- 6) Die Probleme verstächen sich, da noch mehr Ableitungen f'(u;) hinzukommen.
- a) Am Anfong brancht das Lernen lamen, somit ist der Lenfortschritt langsam.

(3) a) 
$$u_1 = u_1 \times +b_1 = 100 \times -100 \stackrel{\times}{=} 0$$

$$u_2 = u_2 y_1 +b_2 = 100 \cdot f(u_1) -50 = 100 \cdot \frac{1}{2} -50 = 0$$

$$f(u_1) = f(u_2) = \frac{1}{2}$$

$$f'(u_1) = f'(u_2) = \frac{1}{4}$$

$$\frac{\partial E}{\partial b_1} = -2(0-y_2) f'(0) \cdot 100 f'(0)$$

$$= 2 \cdot \frac{1}{2} \frac{1}{4} \cdot 100 \frac{1}{4} = \frac{100}{16} = \frac{50}{8} = \frac{25}{4}$$

$$\frac{\partial E}{\partial b_2} = -2(T-y_2)f'(u_2) = -2(0-\frac{1}{2})\frac{1}{4} = \frac{1}{4}$$

b) 
$$\frac{\partial E}{\partial b_i} = \frac{\partial E}{\partial b_{i+1}} \cdot \omega_{i+1} \quad \beta'(u_i) = \frac{\partial E}{\partial b_i} \cdot \frac{100}{4}$$

- c) bei schlechtem / langsamen Lemen => Ketterrealition (die anderen lenen langsamer)
- (i) Die 0055- entropy Funktion vorwendet weniger Ableitungen (f').
